

EXPORT PROCEDURES AND DOCUMENTATION

FOR PRESCRIBED PROCESSED FOODS

This covers the list of products listed on the overleaf.

1. Visit www.jexporter.com or the JAMPRO offices and register to become an exporter. The registration process usually takes three to five days.
2. Register with the Bureau of Standards - Foods Inspectorate Department, for approval and inspection of processing plant. If the product to be exported is a prescribed food (see list overleaf), you should apply for, and obtain, an export certificate from the Bureau for each export shipment.
3. Consult with the Bureau of Standards for general information regarding product standards as well as labelling and packaging specifications required for export.
4. There are some special requirements and standards when exporting to certain markets; information on these may be obtained from the Bureau of Standards or from **JAMPRO**. For example, exporters of low-acid and acidified foods to the USA are required to register their factories and file their scheduled processes with the US Food and Drug Administration (USFDA).
5. Purchase and complete Export Entry Form C82, which is available from the Trade Board or the Jamaica Exporter's Association. Complete all relevant commercial and export forms.
6. You may consult with the Trade Board's Certification Unit to determine whether the product you wish to export qualifies for preferential treatment in any overseas market. If so, purchase the relevant form and obtain the required Certificate of Origin.
7. Check shipping/air cargo rates and schedules as well as provisions for insurance coverage. Complete Packing List (by air) or Docking Receipt (by sea).

NOTE:

- All forms pertaining to the export process are available at the Trade Board
